PALLET SCALE

The U Type pallet scales has been designed to weigh the loads which are on the pallet and especially using for industrial and commercial applications. Through the suitability of industrial standards, robust and durable construction allows to easy weighing. Also it is possible to carry it easily at the facilities through the wheels. Steel and stainless steel constructions are possible.

- Stainless steel construction (304)
- Junction box
- Single points load cells (4 Pcs)
- Model with wheels is possible
- Preferably Laumas or Systec indicator
- Options available in capacities up to 3.000kg
