

MK1 – Overhead Rail Scale (Monorail)

Durable, Simple Installation, Static and In-Motion

MK1 – Overhead Rail Scale

Monorail scale which is mounted into the overhead of the carcass is used for weighing and it is used for in meat processing plant, slaughterhouse and freezer rooms. Any kind of data can be received via PC-based weighing terminals, including labeling and reporting. Dimensions of the monorails can be changed according to the plant physical conditions.

SIMPLE INSTALLATION:

The monorail scale is simple to install. The existing overhead track is cut in two places and the scale inserted between. It uses existing hangers, so there is no need to purchase additional ones.

STATIC and IN-MOTION WEIGHING CAPABILITY:

The carcass weighing monorail scale is available in static and in motion variations. The static scale is trade approved, meaning it is suitable for commercial applications where product is sold by weight

BUILT FOR THE HARSHTEST FOOD ENVIRONMENT:

This overhead track scale is robust enough to stand up to the harsh environments of food processing plants. It features the patented Weigh Bar for outstanding accuracy and durability and the whole scale is galvanised for maximum corrosion resistance.
